Re: Water Rate Study

Bartle Wells Associates (BWA) is pleased to submit to the Del Paso Manor Water District (District) the attached Water Rate Study Report. The results of the of the study are a product of extensive review and input from District staff, residents and the Board of Directors.

This study presents BWA's analysis of the operating expenses of the District and provides five-year cash flow projections and rates. The primary purpose of this study was to analyze the District's water operating fund and make recommendations that would achieve financial sustainability. Another important purpose of this study was to review rates to ensure that they adhere to the State's legal requirements.

The enclosed report recommends updating rates and charges to more accurately recover the costs of providing service to the District's water customers. Recommendations were developed with substantial input from District Board members, staff and the public. BWA finds that the rates and charges proposed in our report are based on the cost of service for each customer, follow generally accepted rate design criteria, and adhere to the substantive requirements of Proposition 218. BWA believes that the proposed rates are fair and reasonable to the District's customers.

We have enjoyed working with the District on this rate study. Please contact us with any future questions about this study and the recommended water rates.

Sincerely,

Doug Dove, CIPFA
Principal

EXECUTIVE SUMMARY

Study Background

The Del Paso Manor Water District (District) supplies water to about 1,800 connections within its service area in Sacramento, CA. Water rates were last increased in 2012 and are no longer adequate to fully cover District operating costs. The proposed water rates were developed through an extensive community outreach process with community meetings held on February 22nd, March 20th, and May 3rd, 2018. Considerable input received from the community, Board of Directors and staff during this process was incorporated into the final rate recommendations. Table ES-1 summarizes the final water rates adopted by the District Board on June 4, 2018.

The Need for Operating Rate Increases

The need for the rate increase is being driven by basic inflationary operating cost increases, higher ongoing costs associated with maintaining the aging well infrastructure, increased pension funding requirements from CalPERS, and increased outreach efforts such as maintaining the District's new website. The District's revenues are not sufficient to cover projected costs, and if not corrected, this deficit would put the District at risk of default.

Pension Costs

The District's pension program is handled by CalPERS, the statewide pension program for public agency employees. CalPERS has recently reduced its "Discount Rate" assumptions which has in turn caused an increase in annual pension contributions required by the District. The District is conservative in its financial management and has stated its goal for funding of its pension liability at about 85%. The District's funding of its pension liability was about 81% as of June 30, 2016. The District's pension liability is always changing due to actual investment returns realized and other actuarial factors. Targeting a specific funding percentage, therefore is approximate because the pension liability is a moving target. Beginning in 2018/19, the annual pension contribution has been increased by \$20,000 (33%) to move the District towards the 85% funding goal.

Capital Improvement Funding is Not Addressed in This Study

The purpose of this study was to develop new rates that will eliminate operating deficits and put the District on a solid financial footing as it assesses its capital needs. Funding for capital projects comes from ongoing system maintenance charges and one-time capacity fees levied on new connections to the system. The District's most recent Water Master Plan is almost 10 years old and out of date. The District is planning on updating the Master Plan in the next year or two and will update its System Maintenance Charges and Capacity Fees based on the updated plan.

Table ES-1					
Del Paso Manor WD					
Proposed Operating Rates

	8"	\$241.90		108.00	133.90
	10"	\$347.75		135.00	511.00
VOLUMETRIC RATES					
	- Metered Accounts	\$1.39		0.95	0.44
	- Temporary Construction	\$2.09		1.43	0.66
Does not include System Maintenance Charges which do not change.					

Reserve Fund Policy

A reserve policy is a written document that establishes reserve goals or targets. At the commencement of the rate study, the District did not have a reserve policy. BWA recommends establishing the following reserve fund targets:

Operating Reserve – Recommended target funding level is 6 months O&M expenses.

Debt Service/Bond Covenant Reserve – As required by bond covenants

System Maintenance/Capital Projects Reserve – To be determined based on update of the Water Master Plan. In the interim period, the recommended funding level is as needed with a minimum of \$200,000.

1 Introduction and Background

1.1 Study Overview

The Del Paso Manor Water District (District), located in Sacramento, California, supplies water to about 1,800 connections within its service area. The District's water system is operated as a self-supporting enterprise. Revenues are derived primarily from water service charges and must be adequate to fund the water system's operating and capital programs. Water Rates were last increased six years ago in May 2012 and are no longer adequate to fund District operating costs. Most District customers do not have water meters and the District's rate structure is predominantly a flat rate structure with only about 100 of its 1,800 customers billed based on their metered volume usage. Without a rate increase, the District is projected to draw operating reserves down to zero within the next twelve months.

The proposed water rates were developed through an extensive process with considerable input from stakeholders, including District Staff, the Board of Directors, and members of the public. Public Community Workshops were held on February 22nd, March 20th and May 3rd to present rate study findings and receive input to be used in developing the final rate recommendations.

The study incorporates American Water Works Association (AWWA) recommended methodologies tailored to meet the District's unique characteristics and develops water rates that proportionally allocate the cost of providing water service from each customer class. The objectives of the water rate study are to:

- Recover the District's annual revenue requirement and costs of providing water service
- Develop a water rate structure that proportionally allocates the cost of service to all customers and encourages water use efficiency and conservation
- Comply with the legal requirements of Proposition 218 and other pertinent California law
- Minimize the long-term impact on customer bills

1.2 Proposition 218

Utility rates are subject to the procedural and substantive requirements set forth in Proposition 218. Proposition 218 was adopted by California voters in 1996 and added Articles 13C and 13D to the California Constitution. Article 13D, Section 6 governs property-related charges, which the California Supreme Court subsequently ruled includes ongoing utility service charges such as water and wastewater. Article 13D, Section 6 establishes a) procedural requirements for imposing or increasing property-related charges, and b) substantive requirements for those charges. Article 13D also requires voter approval for new or increased property-related charges but exempts from this voting requirement rates for water and wastewater service. The substantive requirements of Article 13D, Section 6 require the District's utility rates to meet the following conditions:

- Revenues derived from the fee or charge shall not exceed the funds required to provide the property related service.
- Revenues derived from the fee or charge shall not be used for any purpose other than that for which the fee or charge was imposed.
- The amount of a fee or charge imposed upon any parcel or person as an incident of property ownership shall not exceed the proportional cost of the service attributable to the parcel.
- No fee or charge may be imposed for a service unless that service is used by, or immediately available to, the owner of the property in question.
- No fee or charge may be imposed for general governmental services, such as police or fire services, where the service is available to the public at large in substantially the same manner as it is to property owners.

The procedural requirements of Proposition 218 for all utility rate increases are as follows:

- **Noticing Requirement:** The District must mail a notice of proposed rate increases to all affected property owners. The notice must specify the basis of the fee, the reason for the fee, and the date/time/location of a public rate hearing at which the proposed rates will be considered/adopted.
- **Public Hearing:** The District must hold a public hearing prior to adopting the proposed rate increases. The public hearing must be held not less than 45 days after the required notices are mailed.
- **Rate Increases Subject to Majority Protest:** At the public hearing, the proposed rate increases are subject to majority protest. If 50% plus one of affected property owners submit written protests the proposed rate increases, the increases cannot be adopted.

1.3 Use of Generally Accepted Rate-Making Principles

The rates developed in this study use a straightforward methodology to establish an equitable system of fixed and variable charges that recover the cost of providing service and fairly apportion costs to each rate component. The rates were developed using generally accepted cost-based principles and methodologies for establishing water rates, charges, and fees contained and discussed in the American Water Works Association (AWWA) M1 Manual.

In developing water rates, it is important to know that there is no “one-size-fits-all” approach for establishing cost-based water rates. “The (M1 Manual) is aimed at outlining the basic elements involved in water rates and suggesting alternative rules of procedure for formulating

rates, thus permitting the exercise of judgment and preference to meet local conditions and requirements.”¹

BWA used the following criteria when developing our recommendations for the District’s water rates and finances:

- 1) *Revenue Sufficiency*: Rates should recover the annual cost of service and provide revenue stability.
- 2) *Rate Impact*: While rates are calculated to generate sufficient revenue to cover operating and capital costs, they should be designed to minimize, as much as possible, the impacts on ratepayers.
- 3) *Equitability*: Rates should be fairly allocated among all customer classes based on their estimated demand characteristics. Each user class only pays its proportionate share.
- 4) *Practicality*: Rates should be simple in form and, therefore, adaptable to changing conditions, easy to administer, and easy to understand.

1.4 District Water System

The District owns and operates a water system which pumps, chlorinates and distributes potable water to its customers. The District’s main source of water is groundwater pumped from District wells located within the service area.

The District’s main source of water revenue is water rates which are no longer sufficient to fund operations expenses.

Like many California water agencies, the District has aging infrastructure and is planning to update its water facilities master plan soon. This plan will determine the extent of the District’s capital needs and develop a schedule of future capital projects to fund. The current rate study encompasses operating expenses only and does not include future capital projects. A future rate study done after the water master plan update will meet those funding needs. The District’s System Maintenance Charge which is designated for capital projects is not being increased at this time.

1.4.1 Factors driving Rate Increases

The primary factors impacting the water rates are basic inflationary operating cost increases, higher ongoing costs associated with maintaining the aging well infrastructure, increased pension funding requirements from CalPERS, and increased outreach efforts such as maintaining the District’s new website. The District’s revenues are not sufficient to cover projected costs, and if not corrected, this deficit would put the District at risk of default.

¹ AWWA Manual M1 Manual, Principles of Water Rates, Fees, and Charges, Sixth Edition, 2012, page 5.

1.4.2 Current Water Rates

The District's current water rates are shown in Table 1 below.

Table 1
Del Paso Manor WD
Current (2017) Water Rates

	\$ per Month		
Single Family Residential		Volumetric Rate Commercial	
0 - 5,000 sq. ft.	\$15.75	\$ per 100 CU ft	\$0.95
5,001 - 8,000 sq. ft.	\$20.60		
8,001 - 11,000 sq. ft.	\$24.20	Temporary Construction Water	
11,001 - 14,000 sq. ft.	\$27.85	\$ per 100 CU ft	\$1.43
14,001 - 17,000 sq. ft.	\$31.45		
17,001 - 20,000 sq. ft.	\$35.10	Service Maintenance Charge	\$ per Month
Over 20,000 sq. ft.	\$35.10 + \$1.21 per 1k sf	Residential up to 1"	\$23.05
		Residential over 1" (Per 1")	\$23.05
Duplex/Multi-Family	\$ per Month	Duplex/Multifamily (each side)	\$23.05
0 - 5,000 sq. ft.	\$28.45	Extra Tap (per 1")	\$23.05
5,001 - 8,000 sq. ft.	\$33.30	Commercial up to 1"	\$23.05
8,001 - 11,000 sq. ft.	\$36.90	Commercial 1 1/2"	\$46.10
11,001 - 14,000 sq. ft.	\$40.55	Commercial 2"	\$73.75
14,001 - 17,000 sq. ft.	\$44.20	Commercial 3"	\$138.30
17,001 - 20,000 sq. ft.	\$47.80	Commercial 4"	\$230.50
Over 20,000 sq. ft.	\$47.80 + \$1.21 per 1k sf	Commercial 6"	\$461.00
Flat Rate Commercial	\$ per Month	Fire Service Rates	
3/4" - 5/8"	\$26.60	4"	\$54.00
1"	\$36.75	6"	\$81.00
1 1/2"	\$53.15	8"	\$108.00
2"	\$107.60	10"	\$135.00
Meter Readiness to Service Charge	\$ per Month	Rates effective May 2012	
5/8"	\$15.10		
1"	\$21.00		
1 1/2"	\$30.40		
2"	\$61.45		
3"	\$114.25		
4"	\$186.05		
6"	\$320.20		

Current residential water rates consist of flat rates based on lot size and number of dwelling units. Unmetered commercial customers are charged a flat rate based on water service line size. Commercial metered customers pay a monthly fixed charge which based on meter size, and a variable charge which is proportional to metered water use.

The District's residential flat rate is among the lowest in the Sacramento area (see Chart 1). The District bills water service on a bi-monthly basis for most accounts.

1.4.3 Current Water Accounts

The District serves approximately 1,800 accounts, about 90% of which are single family residential. Table 2 shows current water customers excluding private fire and temporary hydrant meter accounts.

Table 2
Del Paso Manor WD
Current Water Customers As Of December 2017

Account Type:	Number of	Account Type:	Number of
Single Family Residential	Accounts	Flat Rate Commercial	Accounts
0 - 5,000 sq. ft. lot	2	Flat Rate Commercial	4
5,001 - 8,000 sq. ft.	730	3/4" - 5/8"

Over 20,000 sq. ft.	0		
		Total Accounts*	1,795

* Does not include fire protection services

Del Paso Manor is a relatively slow-growth community and therefore can expect a low-growth rate of 0.01% based on actual historical trends was used in developing the financial projections.

A full set of the rate study tables used in evaluating various alternatives explored and developing the final rate recommendations is included in the Appendix to this report. These tables were distributed to the public at the time of the last Community Meeting on May 3, 2018.

1.5 Guiding Principles for Rate Setting

In early 2018, the District approved the following Guidelines for setting the water rates:

1. **Rates Should be Simple, Fair, and Cost-Based:** The District should establish simple, fair, and cost-based rates to the extent possible.
2. **Rates Should Comply with Legal Requirements:** Rates should be set to comply with requirements of Proposition 218 and with all other applicable federal, state, and local laws and regulations.

3. **Rates Should Consider Conservation Requirements:** While the District has ample groundwater supplies at this time, water is a scarce commodity in California and wasteful use should be discouraged. However, rates need to be cognitive of possible revenue loss. Conservation will help the District maintain agreements to sustain the groundwater basin.
4. **Rates Should Generate Adequate Revenues to Fund District Costs, Maintain Prudent Reserve Fund Levels, and Comply with Debt Covenants:** Rates should be set to fully fund costs to operate and maintain the water system, fund needed capital improvements, maintain prudent cash reserves, comply with outstanding debt covenants, and target funding at least 85% of the actuarially-estimated pension liability.

2 Water Financial Projections and Rates

2.1 Water Financial Overview

Bartle Wells Associates conducted an independent evaluation of the District's water system finances.

- Water rates were last increased in May 2012.
- The District is experiencing increases in pension, maintenance and repairs, administration and general and contracts and services costs.
- The District has ongoing debt service requirements totaling approximately \$375,000 per year on its one outstanding debt issue (the 2010 Certificates of Participation).
- The current Water Master Plan is about 10 years old and needs update. Capital costs will be addressed in a future rate study after the Master Plan update is completed.
- Projected water revenues and expenses are based on historical audits, budgets, and up to date information provided by the District. Projected expenses and minimum reserve fund targets were used to develop cash flow projections and annual revenue requirements.

2.2 Historical and Projected Operating Expenses

Table 3 summarizes the District's historical and proposed water operating expenses.

Table 3
Del Paso Manor WD
Water Operating Expenses

Notes on Table 3:

Personnel Expenses

- General Manager transition costs: Management Salaries estimated at \$170,000 in FY 2019/20 with New GM/Existing GM overlap
- Beginning in 2018/19, PERs Retirement Costs Increased to meet goal of 85% funding of liability per Board Direction

Maintenance & Repairs

- Added \$32,500 for replacement of truck in FY2019/20
- Added \$55,000/yr Funding Beginning in 2018/19 for Repairs to Wells #3, 5, 8, 2, 4, 9 and 6B

Administration & General

- Eliminated costs for Modernization of Financial System which will be included in Master Plan update
- Office Expense increased by \$30,000 in FY2018/19 due to costs for newsletter, website, outreach, RFP for auditor, and new OPEB/pension reporting requirements
- Added \$15,000 in FY2018/19 for recruitment costs for new GM
- Updated estimate of Lab Fees

Contracts and Services

- Engineering estimated at \$30,000 per year in FY2018/19 and FY2019/20 (per Board Direction on 3-5-18)

2.4 Debt Service Schedule – 2010 Certificates of Participation

Table 4 summarizes the debt service on the District’s one outstanding debt obligation – the 2010 COPs.

Debt Issuance	Actual		Projected Debt Service Payments				
	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
2010 COP Bonds	\$368,338	\$369,875	\$370,975	\$366,713	\$367,213	\$366,763	\$370,200

2.5 District Cash Reserves

Table 5 summarizes the reserve fund balances as of June 30, 2017. According to the District's auditor, the total reserve amount of \$1,904,669 was composed of \$763,277 in System Maintenance funds (restricted for capital projects), \$531,314 in operating reserves and \$610,078 in restricted debt service funds.

Table 5
Del Paso Manor WD
District Reserve Balance as of June 30, 2017

Component	Use for ¹ Cash Flow
System Maintenance	763,277
Operating	531,314
Restricted for Debt	610,078
Total Reserve	\$1,904,669

2.6 Audited and Projected Water Revenues

Table 6 summarizes the District's audited 2016/17 and projected 2017/18 revenues. Total audited water revenue was \$1,395,860 for 2016/17 and is projected to be \$1,386,380 in 2017/18. Operating rate revenue is about \$795,000/year and restricted capital revenue (System Maintenance Charges) bring in about \$595,000 per year.

Table 6

The water cash flow projections incorporate the latest information available as well as reasonable, prudently conservative assumptions. Key assumptions include:

Growth & Water Demand Assumptions

- The District is a relatively slow-growth community. Growth is projected at 0.1% per year.
- Future water sales are projected to remain flat.

Revenue Assumptions

- Interest income is estimated based on current budget. Future projections are conservatively estimated to stay stagnant; actual amounts will vary based on reserves and future interest earning rates.
- Revenues from rate increases are projected based on the proposed rate increase. System Maintenance charges are not increased in this study and revenues are projected flat.

Expense Assumptions

- Operations and maintenance costs are based on the 2017-18 budget and generally escalate at the annual rate of 3.0% to account for future cost inflation. (Table 3 summarizes the operating expense projections.)
- Capital costs are funded by system maintenance charges and are not a part of this study.

Reserve Assumptions

- Bartle Wells recommends that the District adopt an operating fund reserve target equal to six months of operating expenses.
- The District Board considered six, nine and twelve-month operating reserve targets and decided on the six-month target for use in developing the current rate increase.

The District will need to increase water rates. Based on the assumptions above, BWA created a cash flow projection that determined revenue requirements for the next 5 years. The proposed rate increase is shown in Table 7.

The proposed rates accomplish the following:

- Full Operations funding years 1- 5 (including debt service)
- Minimum debt service coverage of 1.25x net operating revenues over the next 5 years
- Minimum target fund balance of six months' Operations and Maintenance expenses

Rates would be effective following a mailed Proposition 218 notice and successful public hearing. The effective date is projected to be July 1, 2018 which aligns with the beginning of the District's fiscal year.

2.8 Water Rate Recommendations

BWA recommends a single rate increase effective July 1, 2018 (as opposed to a multi-year phase-in) to recover the costs necessary to fund operations costs. BWA also recommends restructuring rates slightly to accurately reflect the cost of water service and maintain equitability between customers. Table 8 summarizes the proposed operating rate increases and excludes the System Maintenance Charges since they are not being increased.

2.9 Regional Water Survey with Proposed Rate Increase

Chart 2 shows the proposed rates in the context of water rates in the Sacramento Area. The District's bill is below the average single-family bill in the area and will continue to be below average with the proposed rate increase.

2.9.1 Single Family Residential Bill Impacts

Estimated residential bill impacts are shown on Table 7. For a typical single-family residence on a lot of up to 8,000 square feet, the current monthly cost of \$43.65 (or \$87.30 on a bimonthly basis) would increase 33.5% to \$58.25 (\$116.50 bi-monthly).

Single Family Bill Calculation						
Formula	Flat Service Charge	+	System Maintenance Charge	=	Total Monthly	Total Bimonthly
Current Bill - 5,001-8,000 sq ft lot	\$20.60	+	\$23.05	=	\$43.65	\$87.30
Proposed Bill - 5,001-8,000 sq ft lot	\$35.20	+	\$23.05	=	\$58.25	\$116.50

2.10 Reserve Policy

A reserve policy is a written document that establishes reserve goals or targets. It provides guidelines for sound financial management with an overall long-term goal of maintaining financial strength and mitigating financial risks associated with revenue timing, capital costs and emergencies. Additionally, adopting and adhering to a sustainable reserve policy helps to achieve and maintain a favorable credit rating for future debt issues.

The appropriate amount of reserves and fund types are determined by a variety of factors. Typically, reserves for water utilities fall into the following categories: operations and maintenance (includes emergency operating funds), debt service and capital. The recommended reserve types and funding amounts are shown below:

1. **Operating Reserves:** Recommended target funding level is six months of operating expenses. The District's O&M budget for 2017/18 is \$1,036,143.

Discussion: Operating reserves (also known as working capital) is critical for the smooth and efficient operation of a water district. These reserves are used to cover extraordinary expenses, revenue shortfalls and other emergencies. The District is a relatively small special district with limited diversification and, as such, it is recommended by Bartle Wells to maintain six months' operating expenses in reserve. Within this reserve, a rate stabilization fund can also be established.

2. **Debt Service/Bond Covenant Reserves:** Recommended funding level is as required by the bond documents.

Discussion: In 2010, the District issued \$5.6 million in bonds to fund certain capital improvements to the system. The District agreed to establish and maintain a dedicated debt service reserve fund as long as the bonds are outstanding. The reserve requirement for the 2010 bonds is \$371,462.50, which is about one annual debt service payment with interest. The Bond Covenants also require the District to maintain its annual revenues, including reserves, sufficient to cover annual operating expenses and 120% of debt service.

3. **System Maintenance/Capital Projects Reserves:** Recommended target funding level varies based on the amount of system maintenance charges collected and the system maintenance projects to be funded from the fund as well as capital funding needs. Recommended target level is a minimum of \$200,000.

Discussion: This reserve segregates the revenues generated by the system maintenance charges from all other funds. These funds are earmarked for system maintenance expenses (including debt service) only. Cash reserves will be required to fund future capital projects that are not funded by grants, loans, bonds or other outside sources. This fund is designed to accumulate funds for future capital projects.

3 Conclusions and Recommendations

This water rate study report presents a comprehensive review of the Del Paso Manor Water District's water revenue requirements, cost allocations, and rate structures. The District last increased rates in May 2012. Since then, the District has experienced inflationary increases in operating costs, a change in the discount rate by CalPERS and need for additional maintenance to its wells and other infrastructure. Current residential rates are flat while commercial customers are either charged a flat rate or a combination of monthly meter charge plus a usage charge. The rate structure needs to be adjusted to accurately reflect the cost of service. These factors were considered in the rate study to fairly develop rates for customers.

3.1 Conclusion

The District practices sound financial planning that has provided for the financial health of the water system. Adoption of these rates reflect the District's commitment to stewarding financially sound utilities and providing reliable, high quality water service that will benefit the community many years into the future.

3.2 Recommendations

BWA recommends that the District adopt the rates shown in this report. Rates were developed as part of a collaborative process that included input from Staff, Board Members, and members of the public.

BWA also recommends that the District formally adopt an operating reserve target equal to six months of O&M expenses to provide for unexpected revenue and expense fluctuations and other contingencies.

At minimum, the District should review and update its water rate study every five years and/or concurrent with Master Plan Updates.

NOTES ON WATER EXPENSE OPERATING PROJECTION (Table 3)

Personnel Expenses

- General Manager transition costs: Management Salaries estimated at \$170,000 in FY 2019/20 with New GM/Existing GM overlap
- Beginning in 2018/19, PERs Retirement Costs Increased to meet goal of 85% funding of liability per Board Direction

Maintenance & Repairs

- Added \$32,500 for replacement of truck in FY2019/20
- Added \$55,000/yr Funding Beginning in 2018/19 for Repairs to Wells #3, 5, 8, 2, 4, 9 and 6B

Administration & General

- Eliminated costs for Modernization of Financial System which will be included in Master Plan update
- Office Expense increased by \$30,000 in FY2018/19 due to costs for newsletter, website, outreach, RFP for auditor, and new OPEB/pension reporting requirements
- Added \$15,000 in FY2018/19 for recruitment costs for new GM
- Updated estimate of Lab Fees

Contracts and Services

- Engineering estimated at \$30,000 per year in FY2018/19 and FY2019/20 (per Board Direction on 3-5-18)

Chart 3 - Single Family Residential Monthly Water Rate Projection: 2Yr Increase*

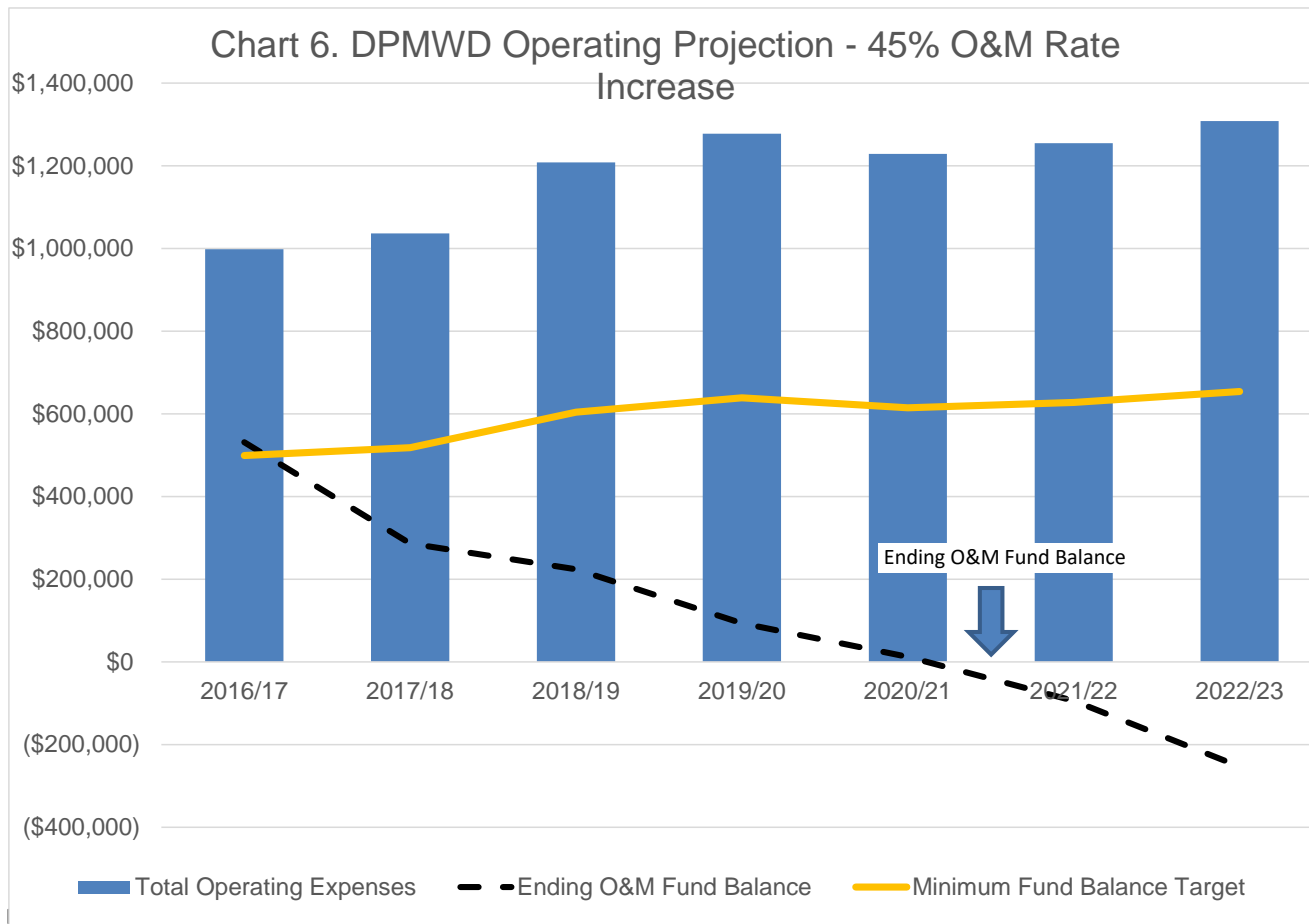

DPMWD - RECOMMENDED RATE INCREASES

1. Operating Reserves reach target in 2020/21
2. District will meet all debt service coverage requirements

DPMWD - RESULTS OF NO RATE INCREASES

1. Operating Reserves go Negative in 2019/20
2. District Will Fail Debt Service Coverage Requirement in 2019/20
3. Total Reserves (Operating and System Maintenance) Will go Negative in 2020/21

1. Operating Reserves go Negative in 2021/22
