June 15, 2022 Special Meeting

As a ratepayer I am asking this Board to carefully consider the timing of the proposed upgrades to the DPMWD infrastructure.

I do understand that we are facing possible problems by delaying this process, but I am beginning to wonder if it is wise to start borrowing money during this economic inflationary period.

I know many of you remember the 70's when the cost of borrowing money was in double digits. I do not think this District can financially withstand those kinds of costs. If you listen to economists and financial advisors, they are predicting we are headed for a similar situation within the next year.

As most of you know I have been in favor of these upgrades as soon as possible. However, I think economic circumstances are drastically changing and it is time to slow the process until the pendulum swings back to more financial stability.

This 218 may be your last shot at convincing the ratepayers before someone in government decides we are unable to run this District as needed.

As keepers of the district financial health the Board owes a very carefully crafted 218 process, including a fair estimation of all the costs, to their ratepayers. Please DO NOT waste this opportunity without giving careful consideration of what this inflationary period will actually cost us.

Carol Rose
